HOSSEIN KAVAND
Front End Developer

PROFILE

A Front End Developer with +4 years of experiences in writing hight-qualit code and delivering it to client. I am a self thought developer, I started learning from scratch.

I constantly update myself with new methods and challenge myself with new stacks, I love sharing my knowledge with other people.
In last few years, I think more than 3 interns getting into programming and building their careers. I also love working with passionate and professional people to learn from them and improve myself in any way possible.
In the last tow years, I got deepeer into JavaScript and other frameworks. It's interseted me to know how they work under the hood.
I have been learning Python as a new Programming language.
I am also open to learning new technologies.

Teamwork is one of the most important aspects of software development and I worked almost all of my career as a part of a team or as a leader, my goal is to match with a team in short time.

In my opinion, programming is not just about a list of skill sets, mindset is more important, it helps you in every way, it can help you lead team in the right way, confronted challenges more easily, and communicate with your colleagues better.

EXPERIENCES

Apsy · Full-time
Front End Developr

June 2022 - Dec 2022
Tehran, Iran

- At Apsy I was the front-end developmer. I worked on the several projects we had there.
  I famelier to packages like react-query and firebase.

- In Apsy we used Graphql and next.js. And to manage the state, and we used the redux and react-query library

SKILLS

JavaScript (ES5, ES6, ES7)

Html & Css

TypeScript

React JS (Redux, Next)

Bootstrap & Tailwind

Vue JS (Vuex, Nuxt)

Sass & Less, PostCss

Angular

- In Apsy our projects were from outside Iran and the subject of the projects was mostly about health and medicine, and this was a very good experience.
  I helped interns and junior developers in this company to find better solutions and fix their bugs.

- Another challenge I had in this company was converting text and photos to pdf and sharing it in different ways

- In one project i made some hooks like cart-shop, useTranslation useMediaUploader and ...
  These hooks are created based on any situation that is logical and necessary

- Skills used in Apsy:

  TypeScript, Next.js, Redux, React-Query, GraphQL, Styled-Components, MUI, Firebase, Codegen,

Almas Store · Full-time

Front End Developr

Jan 2022 - May 2022
Tehran, Iran

- At Almas I was the front-end development leader. I worked on the admin and user side shop dashboard,
  But this dashboard had many challenges such as moving and dragging and so on.

- In Almas we used Graphql and next.js. And to manage the state, we used the redux library, which was a good experience.

- Skills used in Almas:

  TypeScript, Next.js, Redux, Framer, GraphQL, SASS

Gloval Thought Club (GTC) · Part-time
Front End Developer

Oct 2022 - May 2021
Tehran, Iran

- At GTC, I worked part-time on a major international project with a professional team, using Material Ui, Next.js, and Graphql.

- I also worked with Vue.js and Nuxt.js at this company

- Skills used in GTC:

  TypeScript, Next.js, Redux, Framer, GraphQL, SASS, Material UI, Vue, Nuxt.js

ITSaaz · Full-time
Front End Developer

Nov 2020 - Nov 2021
Tehran, Iran

- I was the Lead front-end developer in this company. when I join this company they were creating a new team for their authentication system using AI, we started hiring 3 other developers as a part of Front end team. after that, we built some packages and libraries for PWA systems, then we start working on an admin system panel for the government offices around the country Iran.
- The packages and the library that we built are available on NPM and are mostly used in banking and government system for authentication of the users.
The admin panel that we built was using Angular and took around 6 months to complete. My most challenging work on BehPardakht was developing packages and libraries that are now widely used in the company and for bank and government systems.
This company doesn't have a Remote friendly culture and because of that, I couldn't continue my work with BehPardakht.
- Skills used in ITSAAZ:

  TypeScript, Angular, Redux, React, Rest APIs, SASS, Material UI, Vue, NPM, Webpack, Tree.js

Farabi Brokerage Co (Farabi) · Part-time
Front End Developer

May 2019 - Nov 2020
Tehran, Iran

- I built Sejam Online in Farabi, and I created and published my own package.
- So you can see and use this package in github and npm:
  video-recorder-personal
- Skills used in Farabi:

  React, Redux, Tree.js, SASS, Face-Authentication, Npm

Ale Yasin · Full-time
Junior Front End Developer

Jun 2018 - May 2019
Qom, Iran

- I worked as Front-end Developer with technologies like HTML, CSS, Javascript, React
- And I gained more professional experience in 1 years
- Skills used in Ale Yasin:

  JavaScript, Css, Html, React, Bootstrap
